Jaipur, India

ABOUT ME

A motivated engineering student with particular interest in web and mobile app development (Android/iOS). Proficient in front-end technologies like HTML, CSS, with a growing interest in back-end development. Eager to contribute to meaningful projects and thrive in a collaborative setting.

KEY COMPETENCIES

Proficient in Java, Python, C/C++, HTML, CSS
Algorithmic Thinking
Communication
Teamwork

ACADEMIC PROJECTS:-

YouTube Homepage Replica

- Developed a replica of YouTube's homepage using HTML and CSS, focusing on responsive design and user interface elements.
- Implemented features such as navigation bar, search bar and video/profile thumbnails to create a functional and visually appealing webpage.
- Demonstrated proficiency in front-end web development and attention to detail in design and layout.

Card Workout App (iOS)

- Developed a card-based workout app using Swift, allowing users to shuffle cards and receive exercise prompts based on the card drawn (spades, hearts, clubs, etc.).
 - Demonstrated proficiency in iOS development, user interface design, and creative problem-solving.
-

EDUCATION & CERTIFICATIONS

B.TECH (2nd Year), Vellore Institute Of Technology, Vellore

Majors: Computer Science Engineering

EXTRACURRICULAR ACTIVITIES

Core Committee Member

The Institution of Engineering and Technology (IET)

Projects Domain Member

Apple Developers Group, VIT
